## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's election without traverse of species 1 of figures 1 and 2 in the reply filed on July 2, 2004 is acknowledged.

Claims 1-20 have been cancelled. Claims 21-51 are newly added claims.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21-40, drawn to an apparatus for compressing at least a portion of a patient's skeleton, joints and/or supine during imaging, classified in class 128, subclass 870.
- II. Claims 41-51, drawn to a method for compressing at least a portion of a patient's skeleton, joints and/or supine during imaging, classified in class 128, subclass 870.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of group I may be performed in a method other than the method of group II such as one that would have a step of preparing a patient for the imaging procedure. Likewise, the

Art Unit: 3743

method of group II may be performed by an apparatus other than the apparatus of group I such as one that does not comprising a pair of flexible shoulder straps.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Dana Tangren on August 28, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
